### Session description

This special session deals with healthcare systems design and management. How to make changes in order to improve the whole healthcare system performance becomes the main issue of researchers from organizational and decisional points of view. Promising alternatives of the traditional Health Care System are developed to improve the quality of service, namely the collaborative healthcare logistic network and the Home healthcare and home support systems. In addition researchers on Healthcare organization are involved to provide efficient Health Care Decisional Support Systems to help health care managers to make best decisions in a dynamic and uncertain environment.

The goal is to *discuss new advances in the health care domain*.

The topics of interest include, but are not limited to:

- *Planning and scheduling problems,*
- *Transportation problems (patients and caregivers)*
- *Quantitative techniques and Multiple Criteria Decision Making*
- *Optimization and simulation*
- *Lean Healthcare management.*
